Equitable treatment

of all staff in salary recommendations a necessity
President Evans tells Governing Council

To dismiss academic staff for fiscal reasons would be deemed to be a change in the Haist Rules governing tenured academic staff — which were frozen for the period covered by the Memorandum of Agreement between the faculty association and the University, President John Evans informed the Governing Council at its Feb. 16 meeting.

The President was reporting on the results of a discussion about the matter among representatives of the University administration and of the faculty association. The discussion was prompted by a notice of motion put

forward in the fall by James Kraemer, an administrative staff member on the council, requesting an investigation of policies governing the termination of academic staff.

"This is a matter that the faculty association would not regard lightly," the President said.

The administration has recommended to the council's Executive Committee that no further action be taken on the notice of motion.

"I do not challenge the concept of tenure," Kraemer commented, "but I

French

as a language requirement
again pondered by Academic Affairs

Should French language training be an entrance or exit requirement for the Faculty of Arts & Science?

This question — an amended version of a motion under discussion at the last Academic Affairs Committee meeting — was debated by members when the committee met Feb. 9.

The Faculty of Arts & Science should not demand Grade 13 French as an admission requirement but should insist that students possess a reading knowledge of French in order to graduate, proposed Professor Tom Langan.

He termed the inability of third year philosophy students to read articles by French Canadian philosophers "a perfectly irrational and indefensible situation".

"At least in the major faculty of the University," said Prof. Langan, "people should be able to read the national

languages so they can know what's happening in and to their country."

Professor Henry Auster said that whereas he was personally in favour of bilingualism, the proposed language requirement was "unrealistic".

"It's time U of T began to give some leadership in matters related to Canadian studies," said committee chairman Michael Bliss, supporting Langan's "modest amendment".

Professor Michael Marrus said the role of the Academic Affairs Committee "is to provide leadership in defining a liberal arts education.

"If we wait for the ministry (of colleges and universities) at Queen's Park to work out the definition, we'll end up with the lowest common denominator."

Professors Maurice Lister and Mavis Berridge both opposed establishing a

Student fees to increase in several University divisions

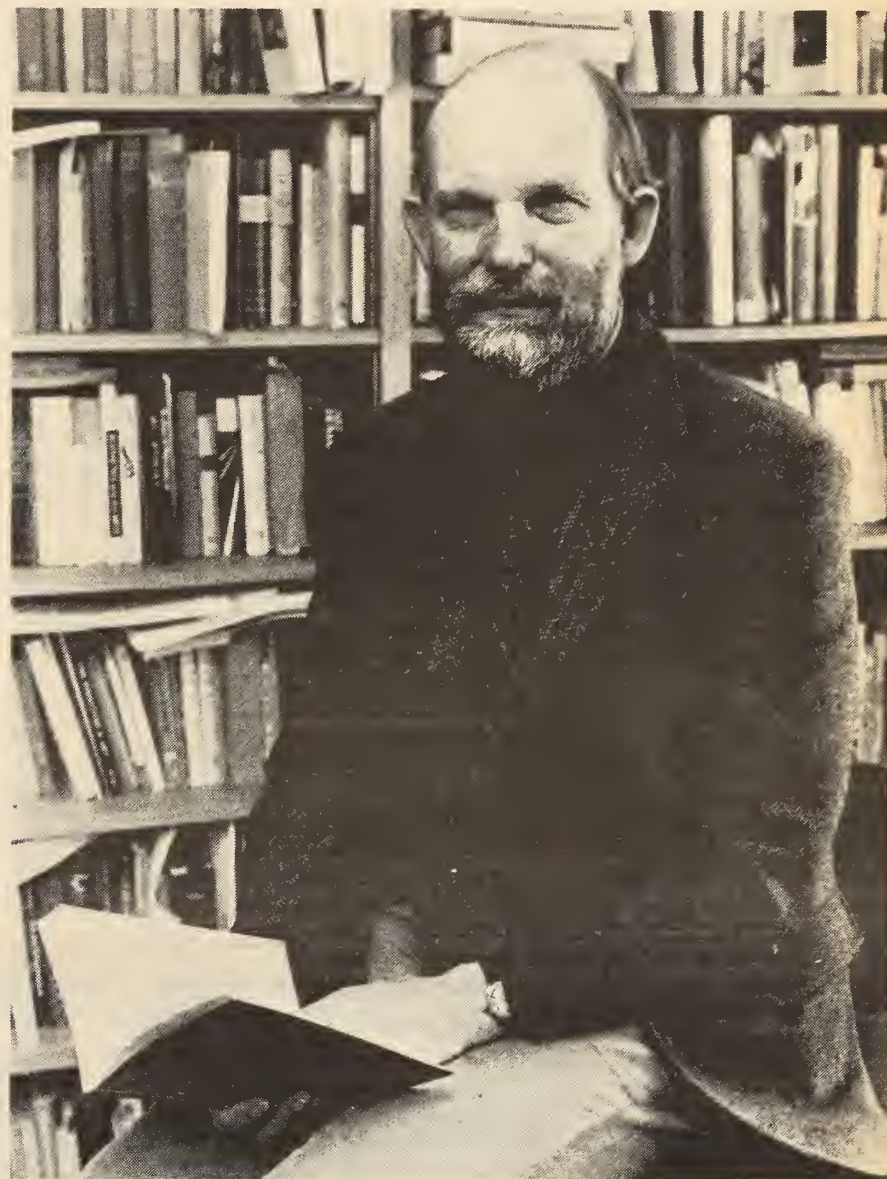

Student fee increases ranging from \$5 to \$60 were approved by the Academic Affairs Committee at its meeting Feb. 9.

Vice-President & Provost Donald Chant said that the Budget Committee recommended adjusting fees up to levels approved by the Ministry of Colleges and Universities "in an attempt to maximize the University's income".

Fees for summer programs in the Faculty of Education were standardized at \$140 in response to a request from the dean. Some courses currently have fees of \$115 while others cost \$140, even though each program involves roughly the same instructional time.

Sesqui award winner

Philosopher Francis Sparshott, Victoria College, is one of 142 Sesqui award winners. For a complete list of award recipients and two individual citations, see Page 4.

Peer assessments

of grant applications will no longer be
confidential or anonymous says new legislation

Assessments of applications for National Research Council (NRC) or Medical Research Council (MRC) funding could become "blander and blander" as a result of the Canadian Human Rights Act passed last summer, says Vice-President & Provost Donald Chant.

The act, known as Bill C-25, contains a section which would make it illegal for the NRC or MRC to withhold from applicants any personal information used by grant selection committees. That information includes peer evaluations of applicants and their proposals.

As of March 1, individuals applying for NRC or MRC grants, scholarships, or fellowships can obtain "through official channels" referees' names and reports. In the past, applicants were sometimes shown excerpts from referees' reports but authors were never identified.

The MRC is already informing all referees that their unedited letters of

assessment for current competitions will be available to applicants who request them. Files on previous MRC competitions will only be opened after names and obvious identifying details have been deleted.

The NRC is advising its referees that only reports dated March 1 or later will be made available to applicants.

Because the Canada Council was established with money from a private foundation, it is not an agency of the crown and doesn't come under Bill C-25. That status, however, could change.

Adrian Brook, chairman of the University's Research Board, says Bill C-25 will probably result in referees watering down their assessments.

"They're bound to be more careful about what they say, at least until they get used to the new system."

Job Openings

Below is a partial list of job openings at the University. Interested applicants should read the Promotional Opportunity postings on their staff bulletin boards, or telephone the personnel office for further information. The number in brackets following the name of the department in the list indicates the personnel officer responsible. Please call: (1) Sylvia Holland, 978-6470; (2) Penny Tai-Pow, 978-5468; (3) Manfred Wewers, 978-4834; (4) Ann Sarsfield, 978-2112; (5) Beverley Chennell, 978-7308; (6) William Hooper, 978-8749.

Clerk Typist II (\$7,430 — 8,740 — 10,050)
Fine Art (1), Purchasing (5), Graduate Studies (2)

Clerk III (\$8,180 — 9,620 — 11,070)
Purchasing (5)

Clerk Typist III (\$8,180 — 9,620 — 11,070)
Best Institute (2), Faculty of Education (1), Personnel (4)

Secretary I (\$8,180 — 9,620 — 11,070)
Sociology (1), U of T Press (2)

Secretary II (\$9,000 — 10,590 — 12,180)
Faculty of Library Science (5), Graduate Studies (2)

Secretary IV (\$11,010 — 12,960 — 14,900)
Vice-President, Business Affairs (5)

Laboratory Assistant II (\$7,430 — 8,740 — 10,050)
Psychology (1)

Laboratory Technician II (\$11,010 — 12,960 — 14,900)
Radiological Research Labs (4), Pathology (4)

Laboratory Technician III (\$12,160 — 14,310 — 16,450)
Pathology (4)

Programmer II (\$12,860 — 15,130 — 17,400)
Computer Centre (3)

Personnel Assistant-Salary Analyst (\$11,010 — 12,960 — 14,900)
Personnel Department, Salary Administration (6)

Assistant Secretary of School (\$17,560 — 20,660 — 23,750)
Graduate Studies (2)

Horticulturist II (\$11,010 — 12,960 — 14,900)
Forestry (5)

Engineering Technologist III (\$14,280 — 16,800 — 19,320)
Physical Plant (3)

Administrative Assistant III (\$15,820 — 18,620 — 21,410)
Administrative Services (5)

Research News

Humanities & social sciences travel applications

The Humanities and Social Sciences Committee of the Research Board will now receive applications for support of travel (no subsistence) for the purpose of delivering papers at overseas conferences. Letter applications should be sent to ORA and should include date and location of conference, amount of assistance required, letter of invitation to participate in the conference, and the department chairman's approval of the application.

The committee's conference travel support program, funded by a Canada Council grant to the University, has been under review for possible changes. The review is continuing, and any changes in the program will be announced at an appropriate time.

Call 978-2163 for further information.

Canadian Ukrainian research studies

The Canadian Institute of Ukrainian Studies at the University of Alberta has announced support for publishable research projects involving Ukrainian-Canadian and Ukrainian subjects in any of the following fields: education, history, humanities, law, library sciences, and social sciences. Applications may be submitted at any time of year, booklet and forms are available at ORA.

Grants will not be offered for contracted or commissioned work, for research for a degree, or for research for

conference papers or articles intended for scholarly journals. The institute has expressed particular interest in proposals involving the development of specialized material for teaching materials in post-secondary education, including the preparation of audio-visual materials, textbooks, anthologies, bibliographies, etc. Applicants must be either Canadian citizens or landed immigrants. Call 978-2163 for details.

Experience '78 applications invited

As announced in the *Bulletin* of Feb. 6, an early deadline of March 3 has been announced by the Ontario Ministry of the Environment for "Experience '78" programs for the support of students employed this summer on environmental projects.

March 3 is also the deadline for "Experience '78" submissions to the Ministry of Energy for two programs: summer student projects in science, environmental studies, or related areas; summer student assistants employed on an energy-related research and development project. The latter program is likely to support only one summer assistant per university.

Application forms, for use by members of departments or faculties interested in supervising student projects, are available at ORA. For assistance, call 978-2163.

Student fees increased

Continued from Page 1

The only committee member to speak against the increases was student Michael Treacy, who said the policy of charging the maximum MCU-approved amount "stinks".

He noted that one fee (for the education faculty's Institute of Child Study) was going up 9.6 percent and asked why that extra money had to come from students.

"At this rate, universities will eventually be charging as much as the market will bear. That's the way the Americans do it and I think it's wrong. Universities are becoming too expensive for lower income families."

Fees in child study rose from \$625 to \$685, in nursing from \$625 to \$670, and in dentistry from \$840 to \$855.

Other business discussed at the meeting included a response from the School of Graduate Studies to the committee's request last September for a review of language requirements in PhD programs. Most departments favoured preserving departmental autonomy in all requirements for the PhD degree, including that of language. Dean James Ham was on hand to answer questions about the report.

Three appointments in the Faculty of Arts & Science were approved by the committee.

Prof. M.E. Marmura was named chairman of the Department of Middle East & Islamic Studies. His term begins June 1, 1978, and ends June 30, 1983.

Prof. Wallace McLeod will be acting chairman of the Department of Classics and Prof. Hannibal S. Noce will be acting chairman of the Department of Italian Studies for one-year terms, beginning July 1, 1978.

How to choose an RRSP so that more of your money comes back to you.

At your Credit Union, we help this happen in lots of ways. Because our first concern (instead of profit) is your financial independence when you're through working, the administration costs to you have been "pared to the bone."

That means that with an RRSP from us, you pay no "front end load" or entry fee. There's no salesman's commission; no extra fees of any kind charged to you.

Your money also does better through our **interest rate**, which, by the way, we calculate for every day it's on deposit.

Check the field and compare what others offer with our healthy...

Is it any wonder are coming to us Savings Plans.

PhD Orals

Since it is sometimes necessary to change the date or time of an oral examination, please confirm the information given in these listings with the Ph.D oral office, telephone 978-5258.

Tuesday, February 21

John Hallonquist, Department of Psychology, "A Comparison of Normal and Lateral Hypothalamic Electrically Induced Feeding in Two Hibernators, *Citellus lateralis* and *Glis glis*." Thesis supervisor: Prof. N. Mrosovsky. Room 309, 63 St. George St., 2 p.m.

Wednesday, February 22

John Richard Purdy, Department of Chemistry, "Synthesis of Alkaloids and Related Terpenes From *Nauclea diderichii*." Thesis supervisor: Prof. S. McLean. Room 309, 63 St. George St., 10.30 a.m.

Thursday, February 23

David Stephen Dime, Department of Chemistry, "Control of Stereochemistry in the Synthesis of Spirobenzylisoquinoline Alkaloids." Thesis supervisor: Prof. S. McLean. Room 307, 63 St. George St., 10.30 a.m.

Nathan Friedman, Department of Computer Science, "Computational Complexity and Numerical Stability." Thesis supervisor: Prof. A.B. Borodin. Room 309, 63 St. George St., 2 p.m.

Monday, February 27

Frederick H. Lochovsky, Department of Computer Science, "Data Base Management System User Performance." Thesis supervisor: Prof. D. Tschritzis. Room 309, 63 St. George St., 10 a.m.

Josef Perner, Department of Psychology, "The Development of Children's Understanding of Principles Governing Decisions Under Risk or Uncertainty." Thesis supervisor: Prof. A. Rapoport. Room 111, 63 St. George St., 2 p.m.

Thursday, March 2

H.I. Wilks, Department of English, "'Beautie and Beauteous Words Should Go Together': A Study of the Eloquent Plainness of George Herbert's *The Temple*." Thesis supervisor: Prof. W. Halewood. Room 309, 63 St. George St., 10 a.m.

Peer assessments

Continued from Page 1

Tom Clarke, director of research administration, says total disclosure could lead to fear of reprisals.

"The grants system could degenerate into a case of 'you cut my throat this time, I'll cut yours next'. To some extent this already happens, but it would be much likelier under Bill C-25."

Robert Painter, assistant dean of the School of Graduate Studies, says it's unlikely a disgruntled applicant would take legal action against a referee.

"Letters assessing applicants and their projects are rarely blatantly negative. The tendency is to damn with faint praise and let the selection committees read between the lines."

Prof. Brook has served on an NRC selection committee and says there's always been an appeal procedure but "less than one percent of the candidates write in complaining they've been hard done by".

Tom Clarke says reactions to decisions depend on people accepting the system. He thinks steps should be taken so decisions are regarded as final by all concerned.

Each applicant could sign a waiver disclaiming the right to see referee letters, suggests Dean Painter.

"As far as I know, the councils haven't mentioned that possibility but I think that's what's done in the U.S. However, candidates should be given assurances about how referee information might be tucked into a computer. Remarks taken out of context could be very damning."

James Ham, dean of the School of Graduate Studies, points out that Bill C-25 "pertains to written judgements but there's nothing to prevent people getting together and talking about a candidate."

"If we're to have a healthy research system in this country, it's essential to select some persons rather than others, particularly when you're dealing with a finite amount of money."

"I think it's entirely proper for a scholar to participate in the peer-evaluation process, as long as judgement is based on proposals, not personality. That being the case, I support a confidential approach."

Tom Clarke estimates 2,000 applications for NRC and MRC grants are made each year from the University; however, only about 500 of those go through a selection committee. The rest are usually funded automatically for a three-year period after initial approval.

Nationwide, he says, the NRC awards about 4,800 scholarships and fellowships annually, with about one-third of that number coming up for formal processing each year.

Clarke has his own theories about "preserving the integrity of the peer-review system".

"Myscheme would be to have selection committees draw up a slate of about 20 possible referees. Three would be selected for each applicant by the NRC's administrative staff who would remove all identifying features upon receipt of each report before passing it along to the selection committee. Applicants could then be given copies of 'doctored' reports along with the committee's slate of possible referees."

"I also think the NRC should push for greater outside input into the decision-making process on research grants. There are international giants in every field. It's a pity they can't be drawn upon."

"At the moment, granting councils stress balanced geographical input from across Canada — at the risk of making regional disparity an issue."

"Rumours are that the next lot of selection committees will include a quota of women and Francophones. Those quotas might reflect the community-at-large, but not the specific academic groups involved. For example, women make up about 51 percent of the total Canadian population, however, they constitute a considerably smaller percentage of biochemists."

Bill C-25 also applies to referees' reports on articles submitted to Canadian Journals of Research.

In a letter to editors of the various journals, editor-in-chief C.T. Bishop said "back files may be destroyed legally up to Dec. 31, 1977; after that date they must be held for some period (maybe two years) or go through a prescribed 'laundering' procedure".

Dean Painter says the act's effect on research articles is not as serious as the effect on grants, scholarships, and fellowships.

"Because the areas in which scientists work are pretty well defined, there is already an openness. For example, if I submitted an article on biochemistry, I would know all the biochemists across the country who might be asked to review it."

"Besides, a paper that's rejected by one publication can always be sent to another, but if a grant proposal is turned down, it can effect a person's entire livelihood."

Italian Week '78

The Italians in our multicultural society is the topic for Senator Peter Bosa, guest at the opening ceremonies for *Italian Week '78*, but it could also serve as a description of the program at St. Michael's College this week.

In the lounge of Brennan Hall, on Monday, Feb. 20, Andy Donato will describe *The Art of Political Cartooning* at 2 p.m. Tuesday at 4 p.m., James Miller, graduate student in Medieval studies, will give a slide presentation on Ambrogio Lorenzetti's *Allegory of Good Government*. At 8 p.m., Giorgio Bassani, novelist and poet, will lecture.

On Wednesday at 3 p.m., panelists Charles Caccia MP, Tony Grande MPP, and Sam Stabile will take part in a forum on political involvement. On Thursday at 4.30 p.m., Richard Diver will give a slide presentation on Italian automobiles. And at 8 p.m. there will be poetry readings by Irving Layton, Pier Giorgio di Cicco, and Len Gasparini.

On Friday, Feb. 24, at 12 noon in 403 Carr Hall, Professor Rigas N. Bertos of McGill University will lecture on *Titian's Presentation of the Virgin in the Temple*. And in the Brennan Hall lounge at 2 p.m., Pasquale Carpino, master chef will expound on Italian cooking.

A series on *Masters of the Italian Cinema* will be held in the auditorium of Carr Hall. On Monday at 4.30 p.m. the subject is Pier Paolo Pasolini and there will be a screening of *Il Decamerone*. Wednesday, at 6 p.m., Luchino Visconti's *Death in Venice* will be shown, followed by a lecture by Professor Anthony Vicari. Federico Fellini's *Amarcord* will be screened on Friday at 4 p.m., followed by a lecture by Enzo Catallo, graduate student in Italian studies.

Calendars of the week's events are available from the community relations office, telephone 978-6564.

How to get a home of your own on \$1,000 a year.

You know all the reasons why you'd like one. So you can paint and paper to make it look the way you want it. So you can enjoy a yard and garden, a family, a pet — maybe even a blossoming fruit-bearing crabapple tree.

The problem is (or was until now) getting that down payment. The solution comes from your Credit Union in the form of a Registered Home Ownership Savings Plan or an "RHOSP".

Trusted by the Co-operative Trust Company of Canada, the Credit Union plan can change you from a spender into a saver. (Picture the house you'd like to live in. By saving a thousand a year on this tax-deductible savings plan, you can even see yourself moving in, in a really short time.)

The deadline is March 1st.

To get in on the plan for 1977 tax savings, get your money in by the first of March. After that we'll help you save a little, gradually, until you reach your \$1,000 goal.

Save up to \$10,000 at a thousand a year or less. As soon as you've got what you need, you can draw it out, buy your home, and that'll be it.

For full details on the plan that has won a name for itself on past performance, talk to the Registered Savings Plan expert at your Credit Union. We'll help you get that home of your own. How you paint and paper it is up to you!

Ray Godfrey

devoted teacher, administrator, professional

"Professor Godfrey began her affiliation with the University in 1935 when she took her BA in modern languages and her diploma in social work. She subsequently received her master's in social service administration from the University of Chicago.

"She has been a member of the Faculty of Social Work since 1949. Her administrative duties have included serving as graduate secretary for a six-year period and as an assistant dean, academic affairs, for a three-year period. She has taught in every area of the curriculum of the faculty and has represented the University on inter-

national, national, and local committees.

"She is considered by the professional community in Ontario and in Canada to be an excellent continuing education specialist and consultant in the field of child welfare. To the social services volunteer community she is seen as a devoted, conscientious and helpful leader.

"Professor Godfrey is evaluated by her students as an outstanding teacher, by her colleagues as a devoted, intelligent and thoughtful associate, and by her University colleagues as a very important member of the University family."

Cressy McCatty

aquatics leader, autonomous learning specialist

"It is with pleasure that the following record is offered on behalf of the nomination of Dr. Cressy McCatty for a Sesquicentennial award. He has been part of the University community as student, athlete, coach, instructor and professor, over a long span of years. As an athlete, he performed successfully in aquatics, gaining recognition as a national calibre swimmer. His coaching record with the University intercollegiate swimming team is indeed an enviable one. Especially in the aquatics field, Cressy's leadership on this campus is one well-known to his students and colleagues.

"In addition, he has co-operated in many of the important developments in the underwater field, being himself an accomplished scuba diver. Research on littoral life in the Caribbean in co-

operation with the ROM and study of marine life in Georgian Bay are examples of his activity in the underwater world.

"Since earning his PhD at OISE, Cressy has taken special interest in continuing education and, as part of that, has directed investigation into autonomous learning. This interest has led him into considerable research activity, resulting in the publication of several papers and in a number of conference presentations.

"His associates are pleased to support his nomination for the Sesquicentennial Long Service Honour Award."

French as a language requirement

Continued from Page 1

uniform policy on French language requirements.

"I think we should all be bilingual," said Prof. Berridge, "but we should all be physically fit, too, and that would require at least two hours a week. The world is full of too much trivia for all of us to learn everything."

Student member Michael Treacy supported making some knowledge of French an exit rather than an entrance requirement but said the committee might be overextending itself in trying to establish policy for the Faculty of

Arts & Science, particularly since the committee seemed unable to reach a consensus.

Vice-President & Provost Donald Chant concluded that Prof. Langan would have to redraft his amendment "to the point where most of the committee can accept the resolution".

The committee postponed stating its position on the issue until its next meeting on Feb. 23, at which time it will attempt to formulate a resolution for submission to Governing Council.

Governing Council

Continued from Page 1

do challenge the guarantee of employment that seems to have attached itself to tenure.

"Just as sure as we are sitting here, this question has to come up in the next negotiations with the faculty association."

He suggested that in a time of financial restraint the University should avoid a tendency towards inflexibility that seemed to be evident in some administrative decisions.

"There is a fundamental principle of equitable treatment of all staff at the University that will be seen this year with the salary recommendations," the President noted. "Such a principle is important for morale. A sense of insecurity can seriously undermine the quality of performance."

Professor Daniel Soberman of Queen's University, the mediator in the salary negotiations between UTFA and the University administration, has completed his proceedings, the President told the council, "and we're awaiting his report".

The salary recommendations for both academic and administrative staff will be announced at the next council meeting, on March 16.

Child care leave

A child care leave policy for members of the teaching staff and librarians, pursuant to article 8 of the Memorandum

of Agreement, was approved by the council:

"Continuous child care responsibilities shall be considered reasonable grounds for a member of the teaching staff or librarian to request a part-time appointment on a temporary basis at the appropriate pro-rated salary. Such a request shall not be unreasonably denied."

When asked by Professor Barry Coutts if a similar recommendation would be forthcoming for non-academic staff, President Evans replied that the matter was being considered and that he would report on a decision, if any, at the next council meeting.

In other business, the term of the Planning & Priorities Subcommittee was extended for one year, to June 30, 1979; an increase in the health service fee for Erindale and Scarborough Colleges from \$12 to \$17 was approved; and the consolidation of the Food Sciences and Hygiene Libraries with the Science & Medicine Library was also approved.

Chairman Marnie Paikin congratulated government appointee William Broadhurst on becoming the council's new vice-chairman, and President Evans announced that former student representative Shirley French had that morning given birth to a six-and-a-half pound baby girl. Both announcements were noisily and unanimously approved.

Library's situation perilous

says committee chairman

Shortage of money has already begun to affect the services provided by the University's library system, and the acquisitions budget is under mounting pressure. There is little hope that the library will be able to maintain the very effective acquisitions policy that has been developed over the past 10 or 12 years. That policy has brought up the standard of the library's holdings to a level of excellence in several areas, and has enormously improved the quality of the collection in all areas. But the days of improvement are behind us. A decline in the quality of the collection as a whole is now almost a certainty. It is important that the deterioration should not be shaped by chance or decided by administrative fiat. The President's Advisory Committee on the University of Toronto Library System hopes to involve the principal users of the library, the students and academic staff of the University, in determining the most acceptable means of controlling the deterioration that the library is being forced by financial circumstances to accept.

The library system must surely be counted among the principal strengths of the University of Toronto. With more than four million volumes, the collection ranks among the ten largest university libraries in North America. It is overwhelmingly the largest university library in Canada. Indeed, it is the only library in Canada which has a good all round research collection that can support scholarly work in a broad range of languages and disciplines. The library is an essential part of the working lives of many of us in the University, and the excellence of the library's collection has a direct impact on the effectiveness of our scholarship and the quality of our day to day academic experience. The library, moreover, is a national cultural resource which serves a public well beyond the boundaries of the University community.

Many of us now take for granted the library's splendidly comprehensive collection of recently published books and periodicals. A large number of us, drawn from a variety of academic disciplines, have grown accustomed to finding in the library almost any scholarly book or periodical published in the last decade. The library budget has been generous enough to support systematic acquisition of newly published scholarly books in almost every field of study and in many languages. Acquisitions have not been directly tied to teaching programs in the University, but have attempted, rather, to give broad coverage to all fields in which there is teaching and research. Large and well established programs or departments have not, by virtue of their size or distinction, been given special consideration or influenced the acquisition policy for new books that has been in operation for the past 10 years or so. No order of priority has been established among the various disciplines.

With the coming of fiscal restraint, the acquisition level of new scholarly books has been maintained even though the purchasing power of the library has declined. Periodical subscriptions have also been maintained, although some duplicate subscriptions have been cut. Sacrifices have been made in other areas. Readers' services in the Robarts Library have been reduced, and the Sigmund Samuel, Science & Medicine, and Engineering Libraries are no longer open as long as they once were. Not all staff who retire or resign from the library are replaced. A number of local libraries, including those of University College, New College, history, political economy, and, early this year, hygiene and food science have been disestablished. The engineering libraries have been reorganized and consolidated. The budgets for old books and for duplicate copies of books have both been cut severely. And this year rising

costs have forced a change in binding policy. Henceforth paperbound books will be placed directly on shelves, and only the most heavily used periodicals will be bound.

But the money derived through these savings will not enable the library much longer to continue to keep its subscription list intact and to maintain its policy of comprehensive buying in a wide range of scholarly fields. The price of new books is rising much faster than the general rate of inflation, and the best opinion is that this trend will continue. The price of periodical subscriptions is rising even faster than the price of books. Periodicals subscriptions now account for about 40 percent of the entire acquisitions budget. The recent weakness of the Canadian dollar has also hit the acquisitions budget hard. More than 90 percent of the library's purchases have been affected by the decline in value of the Canadian dollar relative to a number of other currencies. Last year the University added money to the acquisitions budget for the first time in several years. Perhaps this year there will be another addition. But there is little hope in these gloomy days that such additions will continue. Nor does there seem to be a clear possibility of generating substantial new savings in other areas of the library's budget unless there are major cuts or changes in the services offered by the library. Almost certainly there will have to be significant changes in acquisition policy.

At this point it is not clear what alternative policies are available, at least the alternatives are not yet clear to the Library Advisory Committee, which is only just beginning to grapple with the problem. Before this term is over we hope to be able to suggest to the University community several possible options. It is my impression that only a few of us in the University are more than dimly aware of how perilous is the library's situation. By drawing general attention to the problem, the Library Advisory Committee hopes to involve academics and the University community generally in seeking a broadly acceptable resolution. The policy that is eventually adopted will clearly have important academic implications. Perhaps cuts in buying will be made across the board, distributed equitably among the disciplines, and the quality of the library's collection will decline towards mediocrity. Perhaps a distinction will be made between some disciplines that will be supported with comprehensive buying, and others that will be supported with more selective buying oriented towards classroom requirements. Perhaps a practical method will be devised for co-ordinating our acquisitions with those of other Ontario universities. In an event, it is, in my view, highly desirable that the academic implications of changes in acquisitions policy be widely discussed among academics, and that academics have a powerful voice in determining the direction of those changes. The President's Advisory Committee on the University of Toronto Library System has a strong academic component, and it is appropriate that a University-wide discussion of the library's situation should begin in that committee. As soon as we have developed a range of options for the future we hope that some means will be devised for making possible throughout the University a systematic discussion of the alternatives. In the meantime, I would be pleased to pass on to the advisory committee any suggestions or comments that anyone would like to send me.

R. J. Helmstadter
Associate Professor of History
Chairman, Library Advisory Committee

Governing Council — February 16, 1978 (including action taken at committee level)

- approved outline of University's brief to the Ontario Council on University Affairs
- approved increase in health service fee to \$17 at Scarborough and Erindale Colleges
- approved consolidation of Food Sciences Library and Hygiene Library with Science and Medicine Library
- approved policy on child care leave for members of teaching staff and librarians

In Memoriam

James Philip

Trinity College lost a scholar and teacher of twenty years' standing with the death of James Philip on Dec. 8. He was 76.

James Allenby Philip graduated from Trinity in 1923 and pursued careers as a journalist, timber-cruiser, managing director of Canadian Pacific in Italy, scholar, and soldier before eventually joining the teaching staff of U of T.

He fought in Italy during World War II and remained in Holland after the war to work on two projects for the British high command: the establishment of a 6,000 volume library of books on German military science, and the composition of a narrative describing the

Italian campaign — from the enemy's point of view.

In 1949 he returned to Canada and took on the responsibilities of executive secretary of convocation for Trinity and of part-time lecturer in classics, having earned a doctorate from the University of Florence a decade earlier. He began to teach full time in 1959.

When he left Trinity College in 1969, it was to continue his teaching career at Bishop's University, where he was subsequently named acting dean of arts. He retired from university life in 1973 to pursue his avocation of farming.

James Rae

Dr. James Rae, first registrar of Erindale College, died Jan. 26. He was 70.

He joined U of T's Department of Chemistry in 1937, and taught organic chemistry to pre-medical and pharmacy students. Interested in the effect of sodium fluoride on dental hygiene, he was prominent in the public debate on the fluoridation of drinking water. During his teaching years he was the author of 23 scientific papers and co-author of a laboratory manual of practical organic chemistry.

James Rae served as Erindale's registrar from 1967 until his retirement in

1975, and expanded many of the activities of the registrar's office including scholarships and awards, secondary school liaison and part-time studies.

The J.J. Rae trophy, which he donated, is presented annually to the woman student who has contributed most to Erindale's athletic program.

The college plans to establish an academic award in his name, and those who wish to remember Dr. Rae in this way may send donations, made payable to Erindale College, to Dr. L.T. McCormick at the college registrar's office.

H.J.C. Ireton

Dr. H.J.C. Ireton, Professor Emeritus, Department of Physics, died Jan. 28. He was 87.

Henry John Cunningham Ireton was born on a farm near Perth, Ontario. He graduated from U of T in mathematics and physics in 1916, and obtained the M.A. degree in physics in 1917.

He then joined the Royal Canadian Navy and was immediately seconded to the British Admiralty to work with Professor J.C. McLennan, in combatting the German submarine menace.

After the war he resumed his graduate

work in experimental spectroscopy with Prof. McLennan and during the next dozen years was author or co-author of some 15 papers on atomic spectra and the spectra of the night sky.

Following his appointment to U of T in 1932, his activities became increasingly administrative — supervisor of the advanced undergraduate physics laboratory, acting head of the department, secretary for research administration in Simcoe Hall and, later, ceremonials assistant to the President. In 1967 he withdrew from University activities.

Funds available for students' research

The U of T/York Joint Program in Transportation has funds available for grants to assist students in work on research which is directly related to a degree program or is an independent project of the student's choice.

The program invites proposals from graduate or undergraduate students enrolled at either university in the 1977-78 and/or 1978-79 academic years.

All submissions must be on the joint program student grant form. Deadline for consideration of proposals by the research co-ordinator is March 6.

Further details of these student research grants as well as other special projects are available from the joint program office, room 219, 150 St. George St., telephone 978-7282.

Personnel Policy Board expanded

Professor Frank Iacobucci, Vice-President — Internal Affairs, has announced two recent changes with respect to the Personnel Policy Board. The first change deals with the alteration in the terms of reference of the board and the second relates to the increase in board membership.

The board, established in 1975 in response to reports from a number of committees and task forces concerned with personnel policies for staff members, was instructed to synthesize personnel policy problems in a comprehensive and consistent manner and to draft particular personnel policies for the consideration of the appropriate Governing Council committees. With the signing of a memorandum of agreement with the faculty in June 1977, the terms of reference of the board have been revised to concentrate on the administrative staff and the membership of the board has been increased to reflect this change in scope.

The new terms of reference are: the Personnel Policy Board is responsible to the President for providing advice with respect to the administrative staff on:

- a) the adequacy of existing personnel policies;
- b) additions or modifications to personnel policies, practices, and procedures, referring policy matters to the appropriate committees of the Governing Council;

c) general problems of implementation or compliance and proposals for remedial action where appropriate;

d) submissions and proposals from individuals and groups concerning policy development, implementation or compliance.

The second change was to increase the membership by adding to the group of ten senior academic and non-academic administrators, three representatives from the administrative staff at large. While all appointments to the board have been made by the President, two were taken from a list of nominees from the University of Toronto Staff Association. The new members of the board are: Charlotte Turnbull, Faculty of Medicine and President of UTSA; Carol Belford, Faculty of Arts & Science; William Kent, Office of Admissions.

The others members are: Dean W.E. Alexander, R.F. Brown, Dr. D.A. Chant, Dean M.B.E. Clarkson, Prof. N.G. Dengler, Prof. H.C. Eastman, Prof. P.W. Fox, Dean F.G. Halpenny, A.G. Rankin, and Prof. Frank Iacobucci, chairman.

While the initial period of work for the board involved primarily the development and revision of basic policies which are now contained in the *Manual of Staff Policies*, other broad and important issues such as communications, compliance with policy, need to be addressed.

Get an early start on your road to retirement.

You may already have given some thought to what you'll do when you retire, and how you'll do it. But will you be able to afford it? Get an early start now with a **Retirement Savings Plan**. It makes good sense, because if you start saving today towards your retirement, you can save on your income tax at the same time.

A Retirement Savings Plan allows you to contribute up to 20% of your earned income, to a maximum of \$3,500 a year, or \$5,500 a year if you do not have a registered company pension plan. Your contributions can be invested in any one or combination of three savings options detailed here.

1. Royal Bank RSP Deposits.

These are interest bearing deposits whose long-term nature make it possible to earn a higher rate of interest than on conventional savings deposits.

2. **Income Fund.** Here your contributions are used to purchase high yield bonds, deposit instruments and mortgages insured under the National Housing Act. This fund is actively managed on your behalf by professionals with the objective of maximizing income, while maintaining reasonable price stability and moderate capital appreciation.

3. **Equity Fund.** The objective of this fund is long term capital growth with reasonable income. Your contributions are invested mainly in the shares of Canadian companies. Again, the investment portfolio is managed by the same professionals managing the Income Fund.

Your Royal Bank manager can help you work out a solid plan. Why not call or visit today—before the March 1st deadline.

Start saving with a Retirement Savings Plan.

U of T as elephant?

Allow me to add to the comments on Dr. Macdonald's Review of the Unicameral Experiment.

The Association for Part-time Undergraduate Students feels flattered to have had part of our brief quoted in the review. In the paragraph following the quote, the reviewer says: "If remarks such as these seem to have a slight condescending ring..." It would be unfortunate if the expression "slightly condescending" were to be connected to the APUS phrase by the readers of the review. The expression "slightly condescending" clearly refers to the reviewer's own remarks.

The quote from the APUS brief is intended as a sincere compliment to our full-time colleagues. Maturity brings not only experience but also a degree of caution and even weariness. We can point to occasions in the short history of the Governing Council where the clearer vision of youth was seconded by part-time students and was at times allowed to prevail. The examples are: abandoning the non-academic discipline code, access to the Robarts Library stacks, and the current inequality of visa student tuition fees.

To debate these and other issues,

we think it is important to have a pluralistic, democratic governing body with universal representation. The students take their participation with utmost seriousness, believing that this is the best of governance systems available, and trusting that our participation is viewed equally seriously by the other estates.

The oft-quoted simile obtrudes itself of an elephant as perceived by a group of blind persons, one remarking on the feel of the hide, another on the size of the legs and so on, with no one having a clear concept of the whole. The difference between this University and the beast is that the various estates composing the institution are not observers; we *are* the elephant. The beast is slow and ponderous and can be difficult, but it is likely to live a long time, it is intelligent, and it is capable of great and useful labours. The secret, I suppose, is to have a common goal, and a certain co-ordination of movement.

Marija Hutchison
President
Association for Part-time
Undergraduate Students

Charles Murray, Earl of Cathcart

Alan Bakes' article in the Jan. 30 *Bulletin* on the University's eighth Chancellor suffers, unfortunately, from the consistent misspelling of the distinguished gentleman's name. He was Charles Murray *Cathcart*, eldest son of the ninth Baron Cathcart (in the Scottish peerage), a graduate in law of Glasgow University and an advocate at the Scottish bar, who later became a distinguished soldier and was created successively Viscount Cathcart and, in 1814, Earl of Cathcart in the British peerage, for his services.

Charles Murray, the future Chancellor and distinguished soldier, as Mr. Bakes says, did not inherit the title until his father's death in 1843, and was thus relatively new to his Earldom and to university affairs in 1846-47, his Toronto phase, at which time he was also Commander-in-Chief in Canada.

For most of his service life he was

known by the courtesy title of Lord Greenock, so that his discovery of the native cadmium sulphide mineral became known as Greenockite. This fact is not always known even to geologists, since it is found not far from Greenock in Renfrewshire, Scotland. The mineral is still rare, as I know from long but fruitless searches in its native locality.

The second Earl died on July 16, 1859, just a year after the first public announcement of Darwin's and Wallace's papers, which must surely have interested him.

The earldom still flourishes, the present holder being the sixth Earl and 15th Scottish Baron — and still called *Cathcart*.

W.E. Swinton
Massey College

Derisive comments

On reading Mr. Priddle's derisive comment in the *Bulletin* of Jan. 30, I can only conclude that he is one of those who still imagine that a librarian's academic preparation consists of a typing course.

They are still with us unfortunately.
Marian Greene, B.A. (Hons.), B.L.S.
Librarian
FitzGerald Building

Disaster fund a success

The response to our plea for contributions to a disaster fund on behalf of our colleague Mrs. Anne Leggat is deeply gratifying. Individual donations as well as collections from various departments, students, faculty and staff at all levels are coming in, quite a number of them without identification of the donors. We particularly wish to thank one anonymous benefactor who contributed \$500.

Our thanks to all who have contributed. The account #53 722 at the Royal Bank, Hydro Place, remains open, and even the smallest donations are gratefully accepted. The need for help is still great.

Anne-Marie Jamieson
University of Toronto Staff Association

Historian plaque-ated

It seems extraordinary to me that the *University of Toronto Bulletin* has made no mention of the erection of a Historic Landmarks plaque honouring Vincent Massey outside Hart House on November 2, 1977. The fact that the ceremony involved the Governor-General of Canada and Mrs. Léger whose appearances on the campus are infrequent, makes it odder still.

Mr. Massey's contributions to this University are so numerous and so significant as to require no comment other than perhaps to note that they were dispersed over more than a half

century and in the capacities of student, member of staff, member of the Board of Governors, and Chancellor. A very good case could be made that he is the University's most distinguished graduate and also, despite his multiple contributions to Canadian life, that the proper place to locate a plaque honouring this Canadian was on the campus of the University of Toronto and specifically outside Hart House.

Robin S. Harris
University Historian

Helping create a community

I have been wanting for some time to write and congratulate you and your staff on both the format and the content of the *Bulletin*. It is a delight to receive it and a pleasure to read it. The articles on people and projects are most informative for those of us who seldom stray from our own areas. You are helping to make us a community rather than a collection of buildings spread over a geographical area.

I attend many of the meetings of the Governing Council and its committees, and I am always impressed by the subsequent reports in the *Bulletin* which are concise and impartial.

"Have you seen this week's *Bulletin*?" is becoming a standard question. If one is found to answer no, it is not the case for long.

Laurels to you all!

Charlotte Turnbull
President
University of Toronto Staff Association

Monday, February 20

Some News from the Electronegative Elements, colloquium.
Dr. K. Seppelt, Heidelberg University.
428 Lash Miller Chemical Laboratories.
4 p.m.

Human Sexual Response: Facts and Fallacies, first of three forums.

Tuesday, February 21

Physiological Aspects of Climate, lecture.
Prof. Benjamin Garnier, McGill University.
3101M South Building, Erindale College. 2 p.m. (Geography Erindale)

Publications of the Ukrainian Underground during World War II, lecture.
Prof. Peter Potichnyj, McMaster University.
Common Room, Slavic Languages & Literatures, 21 Sussex Ave.
7.30 p.m.

Mind and Matter, non-credit lecture series of six lectures each.
Series: (1) *Nations in the News*, emerging and established nations; (2) *Lifestyles — 70s*, contemporary issues in daily life; (3) *The Changing Face of Toronto*; (4) *Through the Looking Glass*, science for the layman including astronomy, oceanography, agriculture, solar energy, science fiction; (5) *Flirting with Finance*, theory and practice of personal money management; (6) *Pot Pourri*, grab-bag including photography, auction, theatre night, the metric system.
All lectures will be given at Victoria College weekly on Tuesday evenings at 8 p.m. Registration fee \$25 for one, \$40 for two. Information 978-3813.

Nutrition and Family Planning, seminar.
Dr. Marion Powell and Charlotte Bonds, Department of Health Administration.
4171 Medical Sciences Building. 4 p.m.

Wednesday, February 22

Taddle Creek, illustrated lecture.
Ian Montagnes, U of T Press. Camera Club Room, Hart House. 12 noon.

Depression Years, last of three lecture tours of the Hart House permanent collection.
Chris Boyanski. Map Room, Hart House. 12 noon.

Public Policy and the Housing Problem in Canada, penultimate 1977-78 *New College Public Lectures*.
Prof. L.R. Kurtz, Department of Political Economy. 1017 New College, 40 Willcocks St. 4.30 p.m.

The First Three Hundred Years of Greek Theatre, lecture.
Prof. Elizabeth Gebhard, University of Illinois. Lecture room, McLaughlin Planetarium. 4.30 p.m. (Archaeological Institute of America, Toronto Society)

Carbohydrate Derivatives in the Asymmetric Synthesis of Natural Products, colloquium.
Prof. B. Fraser-Reid, University of Waterloo. 428 Lash Miller Chemical Laboratories. 4 p.m.

Two Perspectives on Shamanistic Motifs in East Asia, colloquium series on East Asia.
Paul Levine and Prof. Frank Hoff, Department of East Asian Studies. 14-228 Robarts Library. 8 to 10 p.m. (East Asian Studies Course Union)

Platinum Group Elements in Some Nickel Sulphide Ores, EPS brown bag seminar.
Eric Hoffman, graduate student, Department of Geology. 1157 South Building, Erindale College. 12 noon.

Lettie Cox, Montreal General Hospital. Auditorium, Medical Sciences Building. 8 p.m. (SAC)

Italian Week '78.
To Saturday, Feb. 25 at St. Michael's College. (See story page 3)

Structure and Dynamics of Circumstellar Matter around Rapidly Rotating Stars, colloquium.
Prof. J.M. Marlborough, University of Western Ontario. David Dunlap Observatory. 4 p.m.

Women, University and Unemployment, forum.
Dian Cohen, Toronto Star; Shelly Acheson, Ontario Federation of Labour; Patricia Adams, Association of Women Executives; and Prof. Dorothy Smith, OISE. East Hall, University College. 1 p.m. (GSU and SAC)

The Politics of Contraception, second of three forums.
Susan Cole, Women's Health Organization, Toronto. Auditorium, Medical Sciences Building. 8 p.m. (SAC)

Russell Drago, piano, afternoon classical concert.
Music Room, Hart House. 1.10 p.m.

The Celtic Hero, the Cuchulain plays of W.B. Yeats, presented in conjunction with symposium, *Canada and the Celtic Consciousness*.
Bayview Playhouse Theatre, 1605 Bayview Ave., to Feb. 26. Performances Tuesday to Saturday, 8.30 p.m.; Sunday, 8 p.m. Saturday matinee, 2 p.m. Reservations 481-6191.

Methods Old and New for Locating Protein-Coding Regions within Viral Eukaryotic DNAs, seminar.
Dr. Bryan Roberts, Brandeis University. 2173 Medical Sciences Building. 4 p.m. (Biochemistry)

Body Fluid Homeostasis, seminar.
Dr. Uwe Ackermann, Department of Physiology. 3227 Medical Sciences Building. 4 p.m.

The Population Dynamics of Seeds, seminar.
Dr. Paul Cavers, University of Western Ontario. 140 University College. 4.10 p.m. (Botany and UC)

The Public Gallery, fourth seminar in series *The Art Market*.
Joan Murray, McLaughlin Gallery, Oshawa. Bickersteth Room, Hart House. 7 p.m. (Art Committee)

Faith and Sexuality — A Christian-Judaic Perspective, last of three forums.
Prof. Gregory Baum, St. Michael's College. Auditorium, Medical Sciences Building. 8 p.m. (SAC)

Joan Hammond, piano recital.
R-3103 Scarborough College. 12 noon.

Fortepiano and Flute, noon hour concert.
Leslie Kinton and James Anagnoson, fortepiano; Susan Prior, flute. Concert Hall, Royal Conservatory of Music. 12.15 p.m. Information 978-3771.

Sabana Devedra, Flamenco guitar, *Music Wednesday Night*.
Prof. Devedra will give a lecture-concert outlining the roots of Flamenco music. Music Room, Hart House. 8.30 p.m.

Thursday, February 23

The Stanford Three-Community Study: A multifactor cardiovascular risk education campaign, lecture.
Prof. John W. Farquhar, Heart Disease Prevention Program, Stanford University School of Medicine. 3154 Medical Sciences Building. 11 a.m. to 1 p.m. (Health Administration and Ontario Heart Foundation)

The Legendary Jascha Heifetz, lecture with film.
Prof. Victor Martin, Performance Department. Walter Hall, Edward Johnson Building. 2.10 p.m.

Contradictions and Crises in the World Economy: The Framework for Latin American Development, lecture in series *Latin America & the International Economic Order*.

Joyce Kolko. Croft Chapter House. 7.30 p.m. (Latin American Studies Committee CIS and Latin American & Caribbean Studies, York) (Rescheduled)

Applications of Plthalides in the Synthesis of Natural Products, colloquium.
Prof. D.B. MacLean, McMaster University. 428 Lash Miller Chemical Laboratories. 4 p.m.

Solitons, Instantons, and Elementary Particles, colloquium.
Prof. A. Klein, University of Pennsylvania. 102 McLennan Physical Laboratories. 4.10 p.m. (Physics and SGS)

Friday, February 24

The Emergence of Bourgeois Culture in Japan in the 1920s, lecture.
Prof. John Dower, University of Wisconsin. Upper Library, Massey College. 11 a.m. (East Asian Studies Committee CIS and U of T-York Joint Centre on Modern East Asia)

Some of the Intellectual and Social Consequences of Becoming Bilingual, third of four lectures in Lunch & Learn Club Series III, *Bilingualism in Education*.
Prof. Wallace Lambert. McGill University. Innis College Town Hall. 12.15 p.m. Registration fee \$15 for four series of lectures. Information, 978-2400.

The Immune Response: A Degenerate Process, luncheon seminar.
Dr. A. Cunningham, Ontario Cancer Institute. 417 Best Institute. 12.30 p.m. (BBDMR)

Saturday, February 25

The Living Dinosaurs, illustrated lecture.
Prof. Emeritus Loris S. Russell, Department of Geology and ROM. Convocation Hall. 8.15 p.m. (Royal Canadian Institute)

Sunday, February 26

The Big Bang — Origin of the Universe, fourth talk in series *Frontiers of Space*.
Prof. Robert Roeder, Department of Astronomy, Scarborough College. Lecture theatre B, Ontario Science Centre. 3 p.m.

A Keyboard and Wind Concert, third in series, *In Concert at Erindale*.
Six musicians from performance program, Faculty of Music, program includes Arnold, Weinzwieg, Chopin, Mozart. Meeting Place, Erindale College. 2.30 p.m. Tickets \$2.75, students and senior citizens \$2.25. Information 828-5214.

Current issues of contemporary literary theory, 10th of a series of 14 special seminars.
Prof. Fredric Jameson, Yale University. Croft Chapter House. 4 p.m. Information 978-6363. (Comparative Literature)

Atmospheric Deposition, Historical Trends and Acid Lakes, seminar.
Prof. James R. Kramer, McMaster University. 119 Wallberg Building. 4 p.m. (IES and Environmental Engineering) (Rescheduled)

The Reef environment, seminar.
Prof. Paul Copper, Laurentian University. 202 Mining Building. 4 p.m. (Geology and SGS) (Please note date.)

Continental drift and co-evolution of trees, truffles and beasts, biology seminar.
Prof. J.M. Trape, Oregon State University. 2082 South Building, Erindale College. 5.15 p.m.

The Techniques of Composing Classical Regulated Verses (Chin-ti-shih), fifth in series of ten public talks, in Cantonese.
Hui Kah-kui. Lecture Theatre, Faculty of Library Science, 140 St. George St. 7.30 p.m. (East Asian Studies)

Anne of Green Gables, adapted by Donald Harren, music by Norman Campbell. Presented by University of Toronto Schools, 371 Bloor St. West. Feb. 23, 24 and 25 at 8 p.m. Tickets \$3. Information, 978-3212 or 978-3209.

Japan Under American Occupation, lecture.
Prof. John Dower, University of Wisconsin. Senate Chamber, Glendon College, 2275 Bayview Ave. 8 p.m. (East Asian Studies Committee CIS and U of T-York Joint Centre on Modern East Asia)

The Peasant Movement in the Southern Sierra of Peru during the 1960s, discussion.
Hugo Blanco, Cuzco, Peru, with Prof. Gavin Smith, Department of Anthropology, and Prof. Liisa North, York University; moderator, Prof. Jose Nun, Department of Political Economy. Croft Chapter House. 2 p.m. (Latin American Studies Committee CIS and Latin American & Caribbean Studies, York)
